

December 1, 2023

The President
The White House
1600 Pennsylvania Avenue, NW
Washington, DC 20500

CC: Michael S. Regan, Administrator, Environmental Protection Agency

Dear Mr. President:

We are parents, seniors, health professionals, and families living in communities across America, all concerned about air pollution in our neighborhoods and the impacts of climate change. We support strong final rules to secure clean air and improve health. **We call on you: Don't delay, clean air today!**

We are extremely grateful to you for the work you have done since 2021 to tackle the climate crisis and clean up our air, including:

- Passing the largest-ever climate and clean energy investments in the historic Inflation Reduction Act
- Promising to ensure needed climate and clean energy policies to advance environmental justice and serve communities of color through the Justice40 initiative
- Finalizing stronger limits on harmful nitrogen oxides from trucks
- Working to set even stronger limits on emissions from cars and trucks
- Working to limit methane from the oil and gas industry
- Working to set stronger standards for dangerous pollution like mercury, methane, particulate matter, also known as soot, and other power plant pollution
- Taking the initial steps to slash carbon pollution from new and existing power plants.

However, we know we have just a short window of time to finalize these important protections.

The impact of air and climate pollution on our health is clear. Children, individuals who are pregnant, older adults, and people with heart and lung disease are more susceptible to air and climate pollution and need you to act to protect the health and safety of our families.

We urge you to quickly finalize the following key air pollution and climate change measures:

- Much stronger National Ambient Air Quality Standards for Particulate Matter
- Limits on methane pollution from the oil and gas industry
- Stronger greenhouse gas standards for heavy-duty vehicles

- Stronger multi-pollutant standards for light-duty vehicles
- Stronger limits on mercury and air toxics from power plants
- Limits on carbon pollution from new and existing power plants
- Decisions to allow California waivers for its own, stronger cleaner vehicles programs

We also urge you to move swiftly in your review of the National Ambient Air Quality Standards for ozone. Stronger ozone standards are urgently needed for health too.

As President of the United States and Administrator of the U.S. Environmental Protection Agency (EPA), you both have vast responsibility and authority to protect our health.

Our health – and our climate – can’t wait! It’s time to act boldly and swiftly to finalize and implement the strongest possible pollution standards by April 2024 to meet your climate, public health and environmental justice goals.

Don’t delay, clean air today!

Thank you,
